

REVVO: Samsara Integration Setup

Step 1

- Login to your Samsara fleet dashboard with an admin account.
- Click on Settings in the left nav panel, scroll to the Developer section & click on API Tokens.

Step 2

- Click on Add an API Token.
- Under the name, please enter "Revvo Tire Management".
- Leave the Tag Access as "Entire Organization".

Add API Token

General

ℹ Best practice is to have one API token per integration. If there are multiple integrations, be sure to create separate tokens for each.

Name *

Tag Access * ℹ

× Entire Organization

Scopes * ℹ

Certain Read-only scopes have been automatically selected. [Learn more.](#)

Global

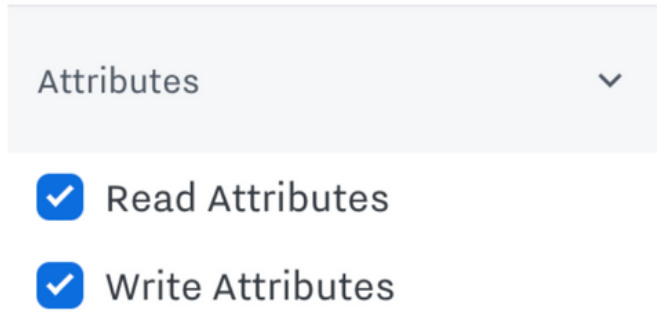

⚠ These selected scopes allow access to all of your organization's data. Proceed with caution when sharing this API token:

- Global Read – this overwrites all existing Read selections

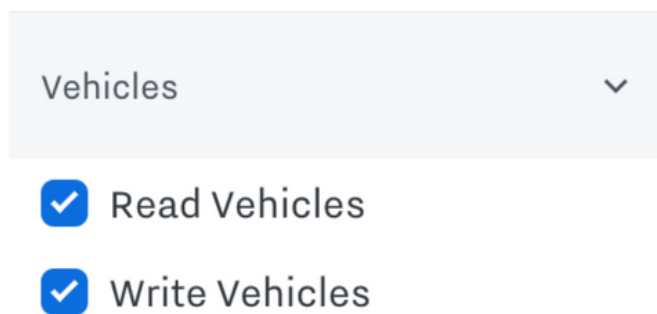

Global Read

Step 3

- Under Scopes
 - We will want to add “Global Read” access.
 - Scroll down to “Setup & Administration” and add “Write Attributes”.

- Scroll down to “Vehicles” and add “Write Vehicles”.

- Hit Save at the bottom of the page.
- Click on the “Copy to Clipboard” button. If you refresh the page, you will have to start over from Step 1!
- Login to your Revvo portal with an administrator account.
- Click on Admin in the left navigation panel, go to the Settings section & click Integrations.

- Enable the Samsara integration if needed.

Step 4

- Under the Credentials section, paste in the API Token and hit Save.
- You can hit the Test button to test the API token.

The screenshot shows a 'Credentials' section with a text input field labeled 'API Key *' containing the text 'API Key'. Below the input field are two buttons: 'Save' and 'Test'.
